Airport growth urgently needed
The World Travel & Tourism Council (W TTC) delivers a stark warning that the UK's travel and tourism industry - which is expected to generate over £190bn in 2007 - is under threat from infrastructure constraints created by a lack of airport growth.

The UK has the world's fifth largest travel and tourism economy, an industry that now contributes 9.1% of UK GDP and 8.5% of UK employment in 2007. However the W TTC has warned that the UK government must 'act now' to maintain its strong economic position or risk jeopardising economic prospects.

Chairman's Remarks
by John Leach

Dear Member

Several projects are proceeding within the club currently and I want to update you all on their progress to date.

I would also like to thank everyone who took the time to complete the Members questionnaire. We received many comments some positive, some proposing changes and some with new approaches. We are presently reviewing the surveys and will be providing full feedback to you. It is a very useful exercise in terms of determining the Joint Club Committee's Agenda going forward.

As this will be the last Newsletter of the current Joint Club Committee I would like to take this opportunity to acknowledge your support and encouragement during the last three years, it was much appreciated. We hope that our efforts, on your behalf, during this time have helped to progress the aims of Seapoint.

Club House Update

Buildings and Facilities

Since the EGM in August a lot of work has gone to review and revise the project to meet with the expressed views of the members. New drawings are on display in the clubhouse reflecting the changes that are required to the project.

Essentially the Lounge, Members Bar and upgraded Entrance Lobby have been removed from the plans and the Committee Room has been scaled back.

[Full Story](#)

Green's Committee Update

The Committee, in conjunction with Declan Branigan Design, have embarked on many improvements to the design of the course over the past 4 winters. These improvements have met with the approval of our members and visitors and we would consider them to have been a success. We have now decided that the Winter of 2006 and the Spring of 2007 will be used to deal with all outstanding areas of wear and tear on the course along with fine tuning and upgrading other areas.

Priorities in this area include addressing the pathways and walk offs around the 17th Green, re-instating the practice ground and completing the 9th hole.

Other areas of wear and tear will also be addressed as part of this winter programme.
